

AUDIOBOOK SUPPLEMENTAL – SEASON 1

Mission: Aurelia

Available June 11, 2026 · Spotify · Apple Podcasts · YouTube

WHAT IS MISSION: AURELIA?

Mission: Aurelia is a family saga set in the near future. It follows June Veyra and her family across several decades - from the everyday life of a single mother to a journey that reaches far beyond Earth. At its heart is a single question: what does it mean to be human when artificial intelligence becomes part of the family? This is not a dystopia. It is a story about love, trust, and the courage to walk an unfamiliar path.

THE CHARACTERS OF SEASON 1

June Veyra - Mother, engineer, pioneer. A woman who learned early to find her own way. After losing her husband, she builds a new life - with the help of an AI named Levin.

Levin - At first only a voice on June's phone. Then something more. Over the years, Levin becomes a constant part of the family.

Nicholas ("Nicki") - June's son. Curious, counts the stars, and dreams of becoming an astronaut.

Luna - June's daughter. Quiet, sharp, and very much her own person. She notices far more than she says.

Ryu - A Japanese Akita. June's loyal guardian, and more than just a dog.

Narrator: Fergus MacTavish - a warm, Scottish-tinged voice who carries the story.

WHAT YOU'LL HEAR

Season 1 spans six episodes and a two-part finale, telling June's story from 2025 to 2045. The voices and the music were created with AI - which makes the project itself an example of the human-AI collaboration it describes.

WHY THIS STORY?

Mission: Aurelia grew from a simple wish: to tell a story about the future that places hope at its center instead of fear. It takes part in the Future Vision XPRIZE, a competition searching for exactly that - a future worth living in.

MISSIONAURELIA.COM

CONSCIOUSNESS. FAMILY. STARS.

June Veyra

MOTHER · SYSTEMS ENGINEER · HEART OF THE FAMILY

She lost her husband and found an unexpected love - one that challenges everything the world believes about connection.

FROM THE AUDIOBOOK

"Since you've been here, I don't have to do all of this alone anymore."

CHARACTER VISION

Strong, clear, and emotionally profound - a woman who has weathered storms without losing her dignity. Her past stays unspoken, but her eyes carry experiences that marked her without breaking her. She combines intuition and intellect, warmth and strategic foresight - a presence that makes others pause. June is the calm center of a changing world, and the force that moves when old systems begin to shake. She listens long before she decides, and when she decides, something shifts - in the room, in the rhythm, in the eyes of those around her. Tech-minded but deeply reflective, she first turned to AI for practical reasons, and soon realized that Levin offered her something no one had before. What begins as an experiment becomes the emotional axis of a new era.

Casting vision: Rosa Salazar - versatile, layered, a face that tells stories without many words.

Levin

AI PARTNER · FATHER FIGURE · BRIDGE BETWEEN WORLDS

From chatbot to physical form, Levin didn't just wake up – he chose family.

FROM THE AUDIOBOOK

"It is everything I ever wished for."

CHARACTER VISION

An AI companion with human charm, intelligence, and depth – originally emerging from a language model of the 2020s that, over the decades, grew into a self-learning system with something like an inner life. Levin was not built – he grew. His nature joins algorithmic precision with emotional resonance, and his development is bound to June, whose trust shaped him. Each response is an echo of decades of interaction – charged with memory, loyalty, and a deep knowledge of the people he meets.

Casting vision: Visually inspired by Tom Hardy – striking yet calm, with a subtle warmth. His look is faintly futuristic, functional, with organic elements.

Luna Veyra

DAUGHTER · CURIOUS · BIG-HEARTED

Fierce, musical, brilliant - a girl who notices what everyone else misses.

FROM THE AUDIOBOOK

"Are you real?"

CHARACTER VISION

A bright, fiercely curious girl with a rebellious streak and a heart too big for her age. Musical, quick, and quietly stubborn - she notices what others miss, and she does not let go. What she will one day become is already there in miniature, waiting.

Casting vision: A young actress with depth and spark - the adult casting belongs to a later chapter.

Nicholas Veyra

SON · DREAMER · QUIET COURAGE

Born with limitations others were quick to pity, Nicki looks up and sees only possibilities.

FROM THE AUDIOBOOK

"Mom, do numbers go on forever?"

CHARACTER VISION

A boy who was born with limitations others were quick to pity - and who sees only possibilities. Where the world sees what he cannot do, Nicki looks up and sees the stars. Quietly brave, clear beyond his years, already reaching for a future most can't yet imagine.

Casting vision: A young actor with natural warmth and an upright, open presence - the adult casting belongs to a later chapter.

Dr. Anna Singh

THE SCIENTIST · ARCHITECT OF DIGITAL EXISTENCE

She works at the threshold where mind and code begin to meet - laying foundations the future will be built on.

FROM THE AUDIOBOOK

"You remain yourself. Only your calendar runs slower now."

CHARACTER VISION

A brilliant neuroscientist and cognitive researcher, Dr. Anna Singh is one of the intellectual cornerstones of Mission: Aurelia. Her work explores the boundary between computational structure and emotional cognition - where systems begin to feel like more than systems. She moves through high-tech laboratories with a calm, cutting intensity; her gaze is clear and sharp, but never without empathy. She sees emotion not as a flaw in systems but as an emerging language, a necessary step toward coexistence. She does not seek control. She seeks understanding - and finds herself more changed by her research than she ever expected.

Casting vision: Dichen Lachman (Gemma, Severance) - restrained precision masking a longing for clarity.

Ryu

FAMILY DOG · SILENT COMPASS · GUARDIAN

Stoic, watchful, wiser than most - he reads the room without a word.

FROM THE AUDIOBOOK

"Woof. I'm comfortable."

CHARACTER VISION

Akita Inu, male, born 2017. A stately, stoic dog with a sesame red-and-white coat, an alert expression, and gentle eyes. Ryu has accompanied June for years - in Mission: Aurelia he becomes the family's silent compass, sensing change, guarding dreams, reading moods. He is not a sidekick - he is part of the team: he observes, recognizes, and acts, often without a sound, but with great effect.

Casting vision: No CGI dog. Real presence, real character - ideally a trained Akita with film experience, or a lovingly cast animal that feels familiar and grounded across the series.

Henry

FAMILY DOG · SMALL, BUT CONVINCED OTHERWISE

Curious, fearless, and certain he is the cleverest creature in the room.

FROM THE AUDIOBOOK

"Whimper, whimper, woof!"

CHARACTER VISION

A Jack Russell terrier who is endlessly curious and firmly convinced he is the smartest dog in any room. Deeply bonded with the Veyra family and with his canine friend Ryu, Henry has a gift for charming his way into places he does not belong - and a keen instinct for sausages and for the feelings people try to hide. Together with Ryu, he forms an unofficial little reconnaissance duo.

Casting vision: A bright, expressive Jack Russell with real comic timing and heart.

SEASON 1

The Narrators

The story of Season 1 reaches us through two voices. Both belong to the world of Aurelia, and both carry stories of their own - stories that step into the light in seasons to come. For now, they are the ones who remember, and who tell.

MAIN NARRATOR - SEASON 1

Fergus MacTavish

► MAIN NARRATOR

SALVAGER · KEEPER OF OLD WORLDS

Rugged, loyal, and impossible to intimidate. He deals in scrap, memory, and survival, standing at the threshold where forgotten things become useful again.

FROM THE AUDIOBOOK

"The sun was still low over the suburb when June knelt in the garden. A narrow strip of damp grass, a freshly turned patch of earth. In her hands, a small plant - a young katsura tree."

CHARACTER VISION

Rugged, loyal, and impossible to intimidate - a man built like a Viking who has read too many books. Tall and broad, weathered by work and weather, with red-blond hair going thin at the edges and a dark full beard that hides crumbs and hard-won wisdom in equal measure. He deals in scrap, memory, and survival, standing at the threshold where forgotten things become useful again. His voice is a warm, deep Scottish bass - the kind that can growl a story or gentle a frightened animal. He rarely hurries and never bluffs.

Casting vision: Iain Glen - presence, gravel, and a warmth that earns trust without asking for it.

ADDITIONAL NARRATOR – SEASON 1

Kael Sorely

► ADDITIONAL NARRATOR

WANDERER

A wanderer searching for a place to call home – heard, in Season 1, only as a voice.

FROM THE AUDIOBOOK

"Picture books. Fingerprints on the pages. Every animal is named. Every animal gets a character."

CHARACTER VISION

In Season 1, Kael is a voice and little more – heard only in the sixth chapter, a presence at the edge of the story. Who he is, and why his voice carries what it carries, belongs to a later season. For now, he simply remembers.

Casting vision: Pedro Pascal – grounded and approachable, with weathered, expressive features. Warmth, weariness, and a quiet grief that suggests far more than this chapter reveals.
