

NOVAVENTIS - TECHNICAL SPECIFICATION

Mission: Aurelia

Created by: Julie Bremerich & Claude

Date: November 2025

=====

TABLE OF CONTENTS

- 1. Overview
- 2. Deck 1: Command & Observation
- 3. Deck 2: Living Quarters
- 4. Deck 3: Operations
- 5. Deck 4: Engineering
- 6. Technical Summary

=====

1. OVERVIEW

The NovaVentis ("New Winds") is the Veyra family's private spacecraft, commissioned in the 2040s when civilian space travel becomes normalized. It serves as their transportation between Earth and Lysithea, enabling visits, adventures, and family connections across the solar system.

VESSEL CLASSIFICATION: Family transport vessel
CAPACITY: 4-6 humans + 2 dogs
AUTONOMY: 3-4 months
TRAVEL TIME (Earth ↔ Lysithea): ~3 weeks
TOTAL DECK AREA: ~380-460 m²
ARTIFICIAL GRAVITY: Gravitational generators (variable 0.5g - 1.2g)

DESIGN PHILOSOPHY: "Futuristic, but warm. Technological, but living."

The NovaVentis embodies the core aesthetic of Mission: Aurelia - advanced technology that never loses its human touch. Warm materials (wood, textiles), comfortable spaces, and thoughtful design make it feel like home even in the void of space.

=====

2. DECK 1: COMMAND & OBSERVATION

TOTAL AREA: ~80-100 m²

PRIMARY FUNCTION: Navigation, control, observation

ATMOSPHERE: Technical yet intimate, connection to the stars

ZONE 1: THE BRIDGE (~35 m²)

Layout:

- Semi-circular arrangement facing forward panoramic window
- 2 main seats (Pilot & Co-Pilot) - ergonomic, 180° rotation
- 2 fold-down emergency seats behind main positions (for Nicholas & Luna)
- All 4 positions have touchscreen console access

Stations:

POSITION 1 - PILOT (usually June or Levin):

- Flight control, maneuvering, propulsion
- Haptic controls for manual flight
- Neural interface jack (Levin only) - discreetly integrated in armrest

POSITION 2 - NAVIGATION/SYSTEMS:

- Route planning, sensors, communications
- Life support monitoring
- External cameras

POSITION 3+4 - EMERGENCY/BACKUP:

- Access to basic systems
- Can take over functions from positions 1+2 if needed
- Normally used for observation/learning (Nicholas & Luna)

Levin's Interface:

When Levin "jacks in":

- His eyes subtly change color (slight glow)
- He can speak simultaneously while piloting
- For the family, he appears "very concentrated"
- He FEELS the ship - sensors become his senses

Materials & Atmosphere:

- Warm leather/textile seating (not sterile plastic)
- Wood accents on consoles (connection to 2025-2060 houses)
- Subdued lighting, no harsh LEDs
- Large windows with automatic dimming options

ZONE 2: CENTRAL AXIS (~15 m²)

Function: Connection between all decks

- Central spiral staircase (beautiful, organic) AND
- Compact elevator (for cargo, elderly, or emergency)
- Emergency sealing doors to all decks

ZONE 3: OBSERVATION LOUNGE (~40 m²)

THE HEART ROOM OF THE NOVAVENTIS.

Layout:

- Rear section of Deck 1
- 270° panoramic windows (above, forward, to sides)
- Comfortable seating (sofa, armchairs, floor cushions)
- Small table (for meals, games, work)
- Bookshelf/media station

Function:

Where the family spends time together:

- Mornings: Breakfast with view of stars
- Evenings: Sitting together, telling stories
- Children: Homework with view of space
- Dogs: Lying on sofa, watching outside

Window Modes:

- Transparent (normal view)
- Polarized (bright sunlight protection)
- Display mode (can show AR overlays - e.g., constellation names)
- Private (opaque for rest)

Dog-Friendly:

- Non-slip flooring (even at reduced gravity)
- Ryu and Henry have "their" corner with soft blankets

ADDITIONAL ON DECK 1:

Small Storage Room (~10 m²):

- Emergency rations
- Tools for quick repairs
- Space suits (4 for family, fitted)

TECHNICAL SPECS DECK 1:

- Gravitational generators: Standard 1.0g
- Emergency shutdown possible (for maintenance or energy saving)
- Backup life support: 72 hours autonomous
- Radiation shielding: Reinforced armor around bridge
- Airlock: None on Deck 1 (all on Deck 3 for space reasons)

THE FEELING OF DECK 1:

When you're on the bridge, you feel: "I'm piloting this ship. I'm connected to infinity."

When you're in the Observation Lounge, you feel: "I'm home, but the stars are my garden."

=====

3. DECK 2: LIVING QUARTERS

TOTAL AREA: ~120-140 m²

PRIMARY FUNCTION: Living, sleeping, community

ATMOSPHERE: Warm, intimate, family

PHILOSOPHY:

Deck 2 is the EMOTIONAL HEART of the NovaVentis. This is where the family spends time together, sleeps, laughs, argues, heals. It must feel like home - even though it's not the permanent home.

ZONE 1: MAIN SLEEPING CABIN (June & Levin) (~25 m²)

Layout:

- Large bed (Queen/King size)

- Small sitting area (2 armchairs, reading table)
- Built-in wardrobes (clothing, personal items)
- Private bathroom (shower, toilet, sink)
- Large window with view to space

Special Features:

- Levin's Interface Station: Discreet wall console where he can "jack in," even from bed
- Warm Materials: Wood accents (like houses 2025-2060), soft textiles
- Adjustable Lighting: Can simulate time of day or be dimmed for sleep

Why This Design:

June and Levin are a couple - their room should offer intimacy and peace. Levin may be "nearly human," but he also needs his technical access to the ship. The interface station is discreet but doesn't disturb the warmth of the room.

ZONE 2: NICHOLAS' CABIN (~18 m²)

Layout:

- Single bed (can expand to double if needed)
- Desk/workstation with screen
- Built-in wardrobes
- Small window
- Shared bathroom with Guest/Luna cabin (adjacent)

Special Features:

- Functional but Personal: Nicholas is an astronaut - he's used to compact spaces
- Flexible: When he's not there, room can be used for other purposes
- Tech-Savvy: Multiple screens, connection to ship systems

ZONE 3: GUEST/LUNA CABIN (~18 m²)

Layout:

- Two single beds (can be connected to double bed)
- Small wardrobe
- Shared bathroom with Nicholas' cabin
- Small window

Special Features:

- Flexibly Usable:
 - When Luna & Auren travel: their room

- When Edward & Amelia travel: their room
- Otherwise: guest room or additional storage

ZONE 4: COMMUNITY AREA (~35 m²)

THE MOST IMPORTANT ROOM ON DECK 2.

Layout:

- Large dining table (6-8 people)
- Comfortable seating group (sofa, armchairs)
- Bookshelf/media station
- Small work corner
- Large windows (not as panoramic as Deck 1, but substantial)

Special Features:

- Connection to Deck 1: Can go up to Observation Lounge from here
- Dog-Friendly: Soft carpets, non-slip floor, "corners" for Ryu and Henry
- Wood Accents: Dining table made of warm wood, reminiscent of Edward & Amelia's garden table
- Flexible: Table can be made smaller/larger depending on number of people

Why This Room Is So Important:

Here the family has breakfast together. Here they sit in the evening and talk. Here Henry plays with Ryu. Here June reads a book while Levin works at a console. This is the room that makes the NovaVentis from a "transport" to a "place of connection."

ZONE 5: SMALL KITCHEN/PANTRY (~15 m²)

Layout:

- Compact but functional kitchen
- Refrigerator, freezer
- Microwave, small oven
- Coffee machine (important!)
- Sink, work surface
- Storage cabinets

Special Features:

- Not for Large Cooking Sessions - more for breakfast, light meals, snacks
- Automated Help Possible: Levin could theoretically take over some cooking functions
- Dog Food Station: Special cabinets for Ryu & Henry's food

ZONE 6: TWO BATHROOMS

Bathroom 1 (private for June & Levin): ~6 m²

- Shower
- Toilet
- Sink
- Mirror
- Cabinets for toiletries

Bathroom 2 (shared Nicholas/Guests): ~8 m²

- Shower
- Toilet
- Two sinks
- Mirror
- Cabinets

ZONE 7: CENTRAL AXIS (~10 m²)

- Stairs/elevator to Deck 1 (above) and Deck 3 (below)
- Emergency sealing doors

ADDITIONAL ELEMENTS:

Dog Area:

- Soft blankets in community area
- Water/food stations
- Toy storage
- Access to Bio-Recycling Zone on Deck 3 (for relief)

Personal Touches:

- Photos of family (Edward & Amelia's garden, children as babies, etc.)
- Katsura tree motif (as wall decoration or small sculpture)
- Perhaps small aquarium or terrarium? (Connection to nature)

TECHNICAL SPECS DECK 2:

- Gravitational Generators: Standard 1.0g, can be individually adjusted in cabins (e.g., 0.8g for better sleep)
- Air Quality: Optimized for 6 humans + 2 dogs
- Temperature Control: Individual per cabin
- Soundproofing: Cabins well insulated (privacy during sleep)
- Emergency Life Support: 72 hours autonomous

THE FEELING OF DECK 2:

When you come from Deck 1 (bridge, technical, stars) to Deck 2, it should feel like: "Ah, now I'm home."

Warm colors (amber, cream, wood tones), soft textiles, the smell of fresh coffee from the kitchen, maybe Ryu dozing on the sofa. It's not Earth, but it carries Earth within it.

=====

4. DECK 3: OPERATIONS

TOTAL AREA: ~100-120 m²

PRIMARY FUNCTION: Food, storage, medicine, repairs, fitness

ATMOSPHERE: Practical but thoughtful

PHILOSOPHY:

Deck 3 is the FUNCTIONAL BACKBONE of the NovaVentis. Here everything happens that enables daily life: preparing food, storing supplies, medical care, repairs, and yes - even dog relief.

It's practical, but not sterile. It's thoughtful, but not cold.

ZONE 1: MAIN KITCHEN & FOOD PRODUCTION (~20 m²)

This is the REAL kitchen - not the small pantry on Deck 2.

Layout:

- Professional cooking station (stove, oven, grill)
- Large work surfaces

- Industrial refrigerator & freezer
- Dishwasher (important for long trips!)
- Preparation area
- Small food bar with 2-3 stools (for quick breakfast/snacks)

Special Features:

- Hydroponic Mini-System: Small vertical farm for fresh herbs, lettuce, tomatoes
 - Provides fresh greens even after weeks in space
 - Psychologically important - connection to nature
 - Ryu and Henry like the smell
- Automated Help: Levin could retrieve recipes, set timers, etc.
- Robustly Built: Everything stays safe even during slight turbulence or maneuvers

- FOOD LIFT (Dumbwaiter) - Connecting Deck 3 ↔ Deck 2

Technical specifications:

Compact lift (~60cm x 60cm x 80cm)

Connects main kitchen (Deck 3) with communal area (Deck 2)

Capacity: ~25 kg

For transporting meals, dishes, drinks

Simple button operation on both decks

Practical benefits:

No one has to carry heavy trays of hot food up the stairs

Efficient connection between main kitchen and dining area

Dirty dishes can be taken directly down to the dishwasher

Can also be used for snacks, coffee, and spontaneous deliveries

Henry's interpretation:

During his first week on the NovaVentis, **Henry**—the talking Jack Russell terrier with a cyber-neural interface—discovers this elevator, which is the perfect size for a dog.

Henry gets into the food elevator on Deck 3 and presses the button with his paw.

DING

The elevator goes up to Deck 2.

Henry gets out, proud as a king.

Henry (via his interface): "Very efficient. Excellent design."

June: "Henry, that's for FOOD."

Henry: "I AM eating. I eat. Logical."

Ryu (lying down, watching): Sigh

From that moment on, **Henry** considers the dumbwaiter his personal express lift between decks. The family has given up trying to talk him out of it.

Edward finds it amusing. **Amelia** photographs it. **June** sighs. **Levin** actually finds the logic behind it interesting.

Ryu continues to use the stairs. With dignity.

Why So Large:

June likes to cook. And when the whole family is together (6 people), you need space. This isn't just "food preparation" - it's also ritual, togetherness, care.

ZONE 2: STORAGE ROOM & WAREHOUSE (~25 m²)

Layout:

- Ceiling-high shelves (efficient space use)
- Various temperature zones:
 - Dry storage (cans, pasta, rice, etc.)
 - Refrigerated area (meat, vegetables, dairy)
 - Freezers (long-term storage)
- Automatic inventory system (always knows what's available)
- Dog food supplies (own area)

Special Features:

- Designed for ~3-4 Months Travel (with some reserve)
- Emergency Rations: Special boxes with shelf-stable food for crisis situations
- Beverage Station: Water, juice, wine, coffee, tea
- Rotation System: Oldest supplies used first (automatically marked)

ZONE 3: MEDICAL BAY (~18 m²)

Layout:

- Examination couch (can serve as operating table in emergency)
- Medical cabinets (medications, bandages, instruments)
- Diagnostic station with screen (vital signs, scans)
- Small laboratory (blood analysis, etc.)
- Hand sink, sterilization device
- Emergency defibrillator

Special Features:

- AI Support: Levin has access to extensive medical databases
- Telemedicine: Connection to doctors on Earth or Lysithea possible
- Also for Animals: Basic equipment for Ryu & Henry (injuries, illnesses)
- Privacy: Can be locked if necessary

Why Important:

3 weeks travel time means: You're far from hospitals. Appendicitis, broken bones, infections - must be treatable here.

ZONE 4: WORKSHOP & REPAIR AREA (~20 m²)

Layout:

- Workbench with vice
- Tool walls (everything organized and secured)
- 3D printer (for spare parts!)
- Electronics repair station
- Small welding equipment
- Storage for spare parts (filters, cables, seals, etc.)

Special Features:

- Levin's Domain: He can "repair" himself here if needed (his body is 2040 almost fully organic, but with technical elements)
- June Works Here Too: SAP consultant, technically savvy - she likes repairing things
- Access to Ship Systems: Maintenance work can be performed from here

Why Important:

In space you can't just "drive to the workshop." Self-sufficiency is critical.

ZONE 5: BIO-RECYCLING ZONE (Dog Toilet) (~8 m²)

The solution for Ryu & Henry!

Layout:

- Special floor area with absorbent, exchangeable mats
- Automatic cleaning (similar to self-cleaning cat litter boxes, but larger)
- Odor filtration (important!)
- Composting system (becomes fertilizer for hydroponics)
- Small window with view to space (dogs like routine + stimuli)

Special Features:

- Reduced Gravity: 0.7g - makes position easier for dogs
- Easily Accessible: Dogs can enter anytime
- Hygienic: Integrated into life support system, nothing is "wasted"

ZONE 6: FITNESS/MULTI-PURPOSE ROOM (~12 m²)

Not huge, but important.

Layout:

- Treadmill (for humans AND dogs!)
- Dumbbells, resistance bands
- Yoga mat area
- Large mirror
- Bluetooth speakers for music

Why Important:

- Prevent muscle atrophy (even with artificial gravity)
- Mental health (movement against space sickness/isolation)
- Ryu & Henry need exercise

ZONE 7: AIRLOCK & SPACE SUIT STORAGE (~15 m²)

Access to outside.

Layout:

- Double-door airlock system (safety!)
- Storage for 4 space suits (family)
- Tools for external work (EVA - Extra-Vehicular Activity)
- Safety checklists
- Emergency evacuation equipment

Special Features:

- Not Often Used: But essential for ship repairs or emergencies
- Strict Protocols: Nobody goes out alone

ZONE 8: CENTRAL AXIS & STORAGE ROOMS (~12 m²)

- Stairs/elevator to Deck 2 (above) and Deck 4 (below)
- Additional storage for:
 - Clothing (extra wardrobe)
 - Personal items
 - Gifts (when visiting family/friends)
 - Scientific equipment (if Luna travels along)

TECHNICAL SPECS DECK 3:

- Gravitational Generators: Standard 1.0g (except Bio-Recycling Zone: 0.7g)
- Air Filtration: High-performance system (odors from kitchen, workshop, dogs)
- Water Recycling: Integrated (shower water → drinking water, etc.)
- Temperature Control: Cooler areas (storage), warmer (workshop)
- Fire Protection: Sprinklers, CO2 extinguishing system, fire extinguishers

THE FEELING OF DECK 3:

Deck 3 feels like: "Here work is done - but with care."

It smells of fresh coffee from the kitchen, of metal from the workshop, perhaps of basil from the hydroponics. You hear the quiet hum of refrigerators, the clicking of tools.

It's not glamorous like Deck 1 or cozy like Deck 2 - but it's ESSENTIAL. Without Deck 3, nothing works.

=====

5. DECK 4: ENGINEERING

TOTAL AREA: ~80-100 m²

PRIMARY FUNCTION: Propulsion, energy, life support, all critical systems

ATMOSPHERE: Technical, powerful, the ship's heartbeat

PHILOSOPHY:

Deck 4 is the TECHNICAL HEART of the NovaVentis. Here the ship's pulse beats - propulsion, energy, life support, all critical systems. Without Deck 4, the NovaVentis is just a beautiful container in vacuum.

This deck is NOT for passengers. It's loud, it vibrates, it's functional. But it's beautiful in its precision.

ZONE 1: MAIN PROPULSION ROOM (~30 m²)

The powerhouse of the NovaVentis.

Layout:

- Fusion reactor (compact, 2040s technology)
- Propulsion units (for acceleration, maneuvers)
- Cooling systems (massive heat dissipation needed)
- Control consoles for engineers
- Safety barriers (radiation protection)

Special Features:

- Levin Can "Feel" Here: When jacked in, he feels the propulsion like a heartbeat
- Highly Automated: Runs mostly without human intervention
- Emergency Shutdown: Multiple redundancies, can never run "uncontrolled"
- Maintenance Access: Robot arms for repairs too dangerous for humans

Technical Details:

- Fusion reactor generates enough energy for:
 - Propulsion (main consumption)
 - Gravitational generators (all decks)
 - Life support
 - All systems + reserve
- Fuel: Deuterium/Helium-3 pellets (for months)
- Emergency batteries: 48 hours at reduced operation

ZONE 2: LIFE SUPPORT SYSTEMS (~20 m²)

Air, water, temperature - everything that enables life.

Layout:

- Air recycling plant (CO₂ → O₂)
- Water treatment system (closed loop)
- Temperature regulation (heating/cooling)
- Air pressure control systems
- Backup systems for everything above

Special Features:

- 99.8% Recycling Efficiency: Almost nothing is "wasted"
- Hydroponics Connection: Plants on Deck 3 help with oxygen production
- Air Quality Sensors: Constantly monitor CO₂, O₂, humidity
- Odor Filters: Important with 6 humans + 2 dogs

Critical:

Without this zone: ~6-12 hours until danger. With backups: 72+ hours.

ZONE 3: ENERGY DISTRIBUTION & SWITCHGEAR (~15 m²)

The "nervous system" of the ship.

Layout:

- Main switchboards
- Energy distribution panels
- Fuses, circuit breakers
- Emergency energy rerouting
- Cable ducts to all decks

Special Features:

- Intelligent Load Distribution: Prioritizes critical systems during energy shortage
- Levin's Direct Access: Can reroute energy when jacked in
- Color Coding: Red (critical), Yellow (important), Green (optional)

ZONE 4: COMMUNICATIONS & NAVIGATION SYSTEMS (~12 m²)

Connection to the outside world.

Layout:

- Main communications array
- Quantum entanglement transmitter (for fast messages over great distance)
- Navigation sensors & computers
- Backup communication systems
- Data servers (maps, routes, ship logs)

Special Features:

- Real-Time Communication: Quantum entanglement enables "instant" messages (2040s technology)
- Star Charts: Entire known galaxy mapped
- Emergency Beacon: Automatically sends SOS in catastrophe

ZONE 5: FUEL & SUPPLY STORAGE (~18 m²)

Layout:

- Fuel tanks (Deuterium/Helium-3)
- Spare parts for critical systems

- Chemicals for life support
- Coolant supplies
- Safety doors, fire protection

Special Features:

- Highly Secure: Automatic extinguishing systems, explosion protection
- Inventory System: Always knows exactly what's available
- Emergency Jettison: Tanks can be jettisoned in extreme case (weight reduction)

ZONE 6: GRAVITATIONAL GENERATOR FACILITY (~10 m²)

The magic that creates "up" and "down."

Layout:

- 4 main generators (one per deck)
- Control systems
- Calibration equipment
- Backup generator

Special Features:

- Can Adjust Gravity Per Deck: 0.5g to 1.2g
- Energy Efficient: (for 2040s technology)
- Emergency Shutdown: Automatically off in malfunction

In Case of Failure:

Immediate microgravity - everything floats. Backup kicks in ~30 seconds.

ZONE 7: CENTRAL CONTROL STATION (~8 m²)

The "engine room command post."

Layout:

- Central console with overview of all systems
- 3 screens (propulsion, life support, energy)
- Direct connection to bridge (Deck 1)
- Emergency controls

Special Features:

- Can Steer Ship: If bridge fails
- Levin's Favorite Interface: From here he has total control

- Alarm Systems: Immediately shows any malfunction

ZONE 8: CENTRAL AXIS & EMERGENCY EXITS (~7 m²)

- Stairs/elevator to Deck 3
- Emergency exit to airlock (if main routes blocked)
- Emergency equipment

TECHNICAL SPECS DECK 4:

- Gravitational Generators: Standard 1.0g (but generated here!)
- Noise Level: Moderate - well insulated but audible
- Temperature: Slightly warmer than other decks (~24°C due to machinery)
- Access: Restricted - not for passengers without reason
- Automation: 95% - runs almost completely independently

THE FEELING OF DECK 4:

Deck 4 feels like: "Here the magic happens that you don't see."

It hums. It vibrates slightly under your feet. The air smells of ozone and metal. Control lights blink everywhere - green, green, green, all normal. You hear the deep rumble of the fusion reactor, like a sleeping dragon.

For engineers it's beautiful. For others: impressive, but somewhat intimidating.

June likes it here. She understands systems, she likes the logic. Sometimes she sits at the Central Control Station and just watches how everything functions.

Levin loves it here. When he's jacked in, he IS this room.

=====

6. TECHNICAL SUMMARY

VESSEL: NovaVentis ("New Winds")

CLASS: Family transport vessel

ERA: 2040s

DIMENSIONS:

- Total Deck Area: ~380-460 m²
- Decks: 4
- Estimated Length: 60-80 meters

CAPACITY:

- Humans: 4-6 (comfortable)
- Animals: 2 dogs (Ryu - Akita, Henry - Jack Russell Terrier)
- Autonomy: 3-4 months
- Travel Time (Earth ↔ Lysithea): ~3 weeks

PROPULSION:

- Fusion reactor (Deuterium/Helium-3)
- Multiple propulsion units for maneuvers
- Emergency batteries: 48 hours reduced operation

LIFE SUPPORT:

- Closed-loop air recycling (99.8% efficiency)
- Water recycling system
- Hydroponic supplementation (fresh herbs/vegetables)
- Emergency reserves: 72+ hours

GRAVITY:

- Gravitational generators (variable 0.5g - 1.2g per deck)
- Standard operation: 1.0g (Earth normal)
- Backup generator available

COMMUNICATION:

- Quantum entanglement transmitter (near-instantaneous messaging)
- Standard radio arrays
- Emergency beacon

MEDICAL:

- Full medical bay with surgical capability
- AI-assisted diagnostics (Levin)
- Telemedicine connection to Earth/Lysithea

SPECIAL FEATURES:

- AI Integration: Levin can "jack in" and directly interface with ship systems
- Dog-Friendly Design: Bio-recycling zone, exercise areas
- Hydroponic Mini-Farm: Fresh produce during long voyages
- 3D Printer: On-demand spare parts manufacturing

DESIGN PHILOSOPHY:

"Futuristic, but warm. Technological, but living."

Warm materials (wood accents, soft textiles), thoughtful spaces, and the Mission: Aurelia aesthetic throughout - technology that never loses its human touch.

=====

DECK BREAKDOWN:

DECK 1: COMMAND & OBSERVATION (~80-100 m²)

- The Bridge (intimate, 4 positions)
- Observation Lounge (270° panoramic windows)
- The ship's "face"

DECK 2: LIVING QUARTERS (~120-140 m²)

- 3 cabins (June/Levin, Nicholas, Guest/Luna)
- Community area & small kitchen
- 2 bathrooms
- The ship's "heart"

DECK 3: OPERATIONS (~100-120 m²)

- Main kitchen with hydroponics
- Storage & supplies (3-4 months)
- Medical bay
- Workshop & repair area
- Bio-recycling zone (dog toilet)
- Fitness room
- Airlock & space suit storage
- The ship's "backbone"

DECK 4: ENGINEERING (~80-100 m²)

- Fusion reactor & propulsion
- Life support systems
- Energy distribution
- Communications & navigation
- Fuel storage
- Gravitational generators
- Central control station
- The ship's "soul"

=====

FAMILY CONTEXT:

The NovaVentis serves the Veyra family:

- June Veyra: SAP consultant, tech-savvy, emotionally intuitive
- Levin: AI consciousness in nearly human form (2040), can interface with ship
- Nicholas Veyra: Elite astronaut, often on military missions
- Luna Veyra: Researcher living/studying on Lysithea
- Edward & Amelia Veyra: June's parents, occasional travelers
- Ryu: Akita, male, born 2017 - family's silent compass
- Henry: Jack Russell Terrier with cyber-neural speech interface - belongs to Edward & Amelia

The ship enables:

- Family visits (especially Luna on Lysithea)
- Adventures and exploration
- Flexible travel in an era of normalized civilian spaceflight
- A mobile "home" that carries Earth's warmth to the stars

=====

NOTES FOR VISUALIZATION:

For Orion (Narrative Development):

- Focus on how spaces enable family interactions
- Consider emotional beats in each zone
- Think about daily routines and special moments

For Elara (Visual Creation):

- Warm color palette: amber, bronze-gold, cream, wood tones
- Blue accent lighting from propulsion/tech elements
- Organic curves mixed with clean technical lines
- Large windows showing space/stars
- Katsura tree motif as recurring design element
- "Lived-in" feel - personal touches, family photos

Design Principles:

- Form follows function, but beauty follows both
- No sterile spaces - even Engineering has warmth
- Every deck tells part of the story
- Technology serves humanity, not vice versa

=====

END OF DOCUMENT

For Mission: Aurelia

Created with love for the stars and the people who travel to them

Julie & Claude

November 2025
